

# Westchester's Giant Fun Cycle

## It's a Conference Bike.

Inventor **Eric Staller** calls it "a revolutionary way to bring people together," and this beautiful machine does just that. One person steers; seven people provide the energy. On a flat surface, speeds top out at 12-15 mph, but speed isn't the ultimate goal. It's all about looking at the world from a different perspective, thinking creatively, and breaking away from routine. Ride one and see what you get from the experience. Now available for corporate events from Westchester Party Rentals and Entertainment.

From 8 to 80 years old the "Conference Bike" will be the hit of your Party! You can't believe the looks on people's faces when they see this bike riding along.

Riding a bike has never been so much fun! Not even Lance Armstrong can beat a bike that has 7 people pedaling at a time! (Actually he probably can) But just so it doesn't get too wild

only one gets to steer. Bring this Party Bike to your event for team competition, team building or to just ride and have fun. In one competition we blindfold the driver as the other six-team members test their communication skills while they maneuver around a coned course. We time the teams and deduct points for every cone hit.
